Meeting Discipline:
- When to schedule: cancel if owner is absent
- Default duration: 60 minutes.
- Required doc: handoff checklist

Decision Logging:
- Decision format: Context-Decision-Consequences
- Record location: Notion

Escalation Matrix:
- Level 1: director to exec sponsor
- Level 2: director to exec sponsor
- Level 3: owner to manager

Success Metrics:
- Primary KPI: decision cycle time
- Supporting KPI: onboarding completion time
- Review interval: quarterly

Anti-Patterns:
- context loss during handoff
- unclear ownership causing delays
- stale documentation leading to rework

Fingerprint: 5a277a9083da39a7c10cebbb96e3cdb3

Onboarding Track:
- Week 1 focus: team intro sessions
- Week 2 focus: first demo
- Week 3 focus: run a meeting segment

Tooling Setup Checklist:
[] install required CLI tools
[] learn ticket workflow
[] review escalation guide
[] join core chat channels
[] read team charter
[] configure VPN
[] request repo access
[] subscribe to incident alerts
[] set up email and calendar
[] bookmark dashboards

Handoff Acceptance Criteria:
- Definition of done: handoff checklist fully verified
- Evidence: risk register
- Owner confirmation: Tech Lead

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: 9cbe50ae5547c18e5e8c22a2dc82e93c

Goal:
- Provide a repeatable workflow for meeting discipline with clear owners and handoffs.

RACI Snapshot:
- Responsible: Tech Lead
- Accountable: Engineering Manager
- Consulted: Stakeholder
- Informed: Reviewer

Cadence and Rituals:
- Weekly checkpoint: risk review
- Monthly review: status sync
- Communication channel: Confluence page

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a project intake review requests additional acceptance criteria before kickoff

Fingerprint: fe84a0b2602d334b51804b72aa09770b

Meeting Discipline:
- When to schedule: cancel if owner is absent
- Default duration: 30 minutes.
- Required doc: meeting notes

Decision Logging:
- Decision format: Rationale-Tradeoffs-Next steps
- Record location: repo docs folder

Escalation Matrix:
- Level 1: ops lead escalation
- Level 2: owner to manager
- Level 3: manager to director

Success Metrics:
- Primary KPI: decision cycle time
- Supporting KPI: decision cycle time
- Review interval: quarterly

Anti-Patterns:
- stale documentation leading to rework
- stale documentation leading to rework
- unclear ownership causing delays

Fingerprint: 1555151d51773ea31bfae5396f8c10f3

Onboarding Track:
- Week 1 focus: team intro sessions
- Week 2 focus: pair programming
- Week 3 focus: write a doc update

Tooling Setup Checklist:
[] review escalation guide
[] bookmark dashboards
[] request repo access
[] read team charter
[] subscribe to incident alerts
[] set up local dev env
[] learn ticket workflow
[] install required CLI tools
[] configure VPN
[] set up email and calendar

Handoff Acceptance Criteria:
- Definition of done: handoff checklist fully verified
- Evidence: meeting notes
- Owner confirmation: Reviewer

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: 3bc2abd7ba133f7de42a9a345488701e

Goal:
- Provide a repeatable workflow for onboarding with clear owners and handoffs.

RACI Snapshot:
- Responsible: Project Owner
- Accountable: Stakeholder
- Consulted: Engineering Manager
- Informed: Program Manager

Cadence and Rituals:
- Weekly checkpoint: risk review
- Monthly review: status sync
- Communication channel: Email

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a project intake review requests additional acceptance criteria before kickoff

Fingerprint: ed6b4cd5de1cae5f05fd6035b69ac960

Meeting Discipline:
- When to schedule: schedule only with a written agenda
- Default duration: 30 minutes.
- Required doc: decision log entry

Decision Logging:
- Decision format: Context-Decision-Consequences
- Record location: shared drive

Escalation Matrix:
- Level 1: manager to director
- Level 2: owner to manager
- Level 3: ops lead escalation

Success Metrics:
- Primary KPI: action item closure rate
- Supporting KPI: action item closure rate
- Review interval: biweekly

Anti-Patterns:
- context loss during handoff
- too many meetings with no decisions
- too many meetings with no decisions

Fingerprint: 5b0a66a5cd0cb5fdddd9af0d03d2bbef

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: pair programming
- Week 3 focus: run a meeting segment

Tooling Setup Checklist:
[] join core chat channels
[] set up local dev env
[] learn ticket workflow
[] configure VPN
[] set up email and calendar
[] set up MFA
[] request repo access

- Accountable: Tech Lead
- Consulted: Engineering Manager
- Informed: Reviewer

Cadence and Rituals:
- Weekly checkpoint: status sync
- Monthly review: demo review
- Communication channel: Jira ticket thread

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a weekly update highlights dependencies and assigns owners for follow-up

Fingerprint: 67994c48d7156dec51680323e34d12bc

Meeting Discipline:
- When to schedule: timebox discussions with decision points
- Default duration: 25 minutes.
- Required doc: meeting notes

Decision Logging:
- Decision format: Rationale-Tradeoffs-Next steps
- Record location: Notion

Escalation Matrix:
- Level 1: director to exec sponsor
- Level 2: manager to director
- Level 3: ops lead escalation

Success Metrics:
- Primary KPI: documentation freshness score
- Supporting KPI: documentation freshness score
- Review interval: biweekly

Anti-Patterns:
- too many meetings with no decisions
- stale documentation leading to rework
- unclear ownership causing delays

Fingerprint: 9eff91950a4986060a2d3c19e6d48aec

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: pair programming
- Week 3 focus: write a doc update

Tooling Setup Checklist:
[] subscribe to incident alerts
[] set up email and calendar

- Accountable: Reviewer
- Consulted: Stakeholder
- Informed: Stakeholder

Cadence and Rituals:
- Weekly checkpoint: weekly planning
- Monthly review: risk review
- Communication channel: Jira ticket thread

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- two teams negotiate a milestone change and document the decision in a shared log

Fingerprint: d94b1366d6f1f658135dd2c0b051ef76

Meeting Discipline:
- When to schedule: share pre-read 24 hours prior
- Default duration: 60 minutes.
- Required doc: project brief

Decision Logging:
- Decision format: Context-Decision-Consequences
- Record location: Confluence

Escalation Matrix:
- Level 1: manager to director
- Level 2: manager to director
- Level 3: ops lead escalation

Success Metrics:
- Primary KPI: handoff success rate
- Supporting KPI: decision cycle time
- Review interval: quarterly

Anti-Patterns:
- unclear ownership causing delays
- unclear ownership causing delays
- context loss during handoff

Fingerprint: 672bd07d8fea7905a33d8612c5008331

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: system walkthroughs
- Week 3 focus: own a small feature

Tooling Setup Checklist:
[] set up email and calendar
[] subscribe to incident alerts
[] learn ticket workflow
[] configure VPN

Fingerprint: 475af1b55272015947b7aa1764d6ecbb

Goal:
- Provide a repeatable workflow for escalation and incident comms with clear owners and handoffs.

RACI Snapshot:
- Responsible: Reviewer
- Accountable: Program Manager
- Consulted: Stakeholder
- Informed: Project Owner

Cadence and Rituals:
- Weekly checkpoint: weekly planning
- Monthly review: weekly planning
- Communication channel: Teams chat

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a new joiner gets blocked on access and uses the escalation matrix to resolve it

Fingerprint: 3ebf44cd0d15373b83d65335de56cb52

Meeting Discipline:
- When to schedule: timebox discussions with decision points
- Default duration: 25 minutes.
- Required doc: decision log entry

Decision Logging:
- Decision format: Rationale-Tradeoffs-Next steps
- Record location: shared drive

Escalation Matrix:
- Level 1: ops lead escalation
- Level 2: manager to director
- Level 3: owner to manager

Success Metrics:
- Primary KPI: onboarding completion time
- Supporting KPI: handoff success rate
- Review interval: weekly

Anti-Patterns:
- too many meetings with no decisions
- stale documentation leading to rework
- unclear ownership causing delays

Fingerprint: 7ce98c2b3195f1eb6ec2a5fe4c689af0

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: system walkthroughs
- Week 3 focus: write a doc update

Tooling Setup Checklist:
[] subscribe to incident alerts
[] request repo access
[] set up MFA
[] read team charter
[] install required CLI tools
[] set up email and calendar
[] review escalation guide
[] learn ticket workflow
[] join core chat channels
[] bookmark dashboards

Handoff Acceptance Criteria:
- Definition of done: stakeholders sign off in writing
- Evidence: decision log entry
- Owner confirmation: Program Manager

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: 13433dea4403b0efc08fda51396e8b36

Goal:
- Provide a repeatable workflow for stakeholder updates with clear owners and handoffs.

RACI Snapshot:
- Responsible: Reviewer
- Accountable: Program Manager
- Consulted: Reviewer
- Informed: Project Owner

Cadence and Rituals:
- Weekly checkpoint: status sync
- Monthly review: risk review
- Communication channel: Jira ticket thread

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a weekly update highlights dependencies and assigns owners for follow-up

Fingerprint: 7d47d9ac1a61062952b55a5345e503cc

Meeting Discipline:
- When to schedule: timebox discussions with decision points
- Default duration: 15 minutes.
- Required doc: decision log entry

Decision Logging:
- Decision format: Rationale-Tradeoffs-Next steps
- Record location: repo docs folder

Escalation Matrix:
- Level 1: owner to manager
- Level 2: ops lead escalation
- Level 3: director to exec sponsor

Success Metrics:
- Primary KPI: action item closure rate
- Supporting KPI: decision cycle time
- Review interval: quarterly

Anti-Patterns:
- context loss during handoff
- context loss during handoff
- too many meetings with no decisions

Fingerprint: 8523f08379f826fb5ee4741df4a19315

Onboarding Track:
- Week 1 focus: reading core docs
- Week 2 focus: system walkthroughs
- Week 3 focus: resolve a cross-team dependency

Tooling Setup Checklist:
[] set up local dev env
[] read team charter
[] join core chat channels
[] install required CLI tools
[] bookmark dashboards
[] review escalation guide
[] configure VPN
[] set up MFA
[] request repo access
[] set up email and calendar

Handoff Acceptance Criteria:

Fingerprint: fae3c304576990be8081469337eac540

Goal:
- Provide a repeatable workflow for hiring loop coordination with clear owners and handoffs.

RACI Snapshot:
- Responsible: Engineering Manager
- Accountable: Engineering Manager
- Consulted: Program Manager
- Informed: Stakeholder

Cadence and Rituals:
- Weekly checkpoint: demo review
- Monthly review: retrospective
- Communication channel: Email

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- two teams negotiate a milestone change and document the decision in a shared log

Fingerprint: 625130b5d23e05afcf7bfe08797357a4

Meeting Discipline:
- When to schedule: timebox discussions with decision points
- Default duration: 60 minutes.
- Required doc: meeting notes

Decision Logging:
- Decision format: Context-Decision-Consequences
- Record location: shared drive

Escalation Matrix:
- Level 1: owner to manager
- Level 2: director to exec sponsor
- Level 3: director to exec sponsor

Success Metrics:
- Primary KPI: handoff success rate
- Supporting KPI: decision cycle time
- Review interval: biweekly

Anti-Patterns:
- context loss during handoff
- context loss during handoff
- too many meetings with no decisions

Fingerprint: 92e655c3a7c641b6a511b12f9b5af79d

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: pair programming
- Week 3 focus: own a small feature

Tooling Setup Checklist:
[] learn ticket workflow
[] set up MFA
[] request repo access
[] subscribe to incident alerts

- When to schedule: share pre-read 24 hours prior
- Default duration: 25 minutes.
- Required doc: meeting notes

Decision Logging:
- Decision format: Context-Decision-Consequences
- Record location: Notion

Escalation Matrix:
- Level 1: owner to manager
- Level 2: owner to manager
- Level 3: owner to manager

Success Metrics:
- Primary KPI: decision cycle time
- Supporting KPI: documentation freshness score
- Review interval: monthly

Anti-Patterns:
- stale documentation leading to rework
- unclear ownership causing delays
- context loss during handoff

Fingerprint: 5defe317f41a2f0a8bcdbb7e41a6adf1

Onboarding Track:
- Week 1 focus: reading core docs
- Week 2 focus: system walkthroughs
- Week 3 focus: own a small feature

Tooling Setup Checklist:
[] join core chat channels
[] subscribe to incident alerts
[] configure VPN
[] set up local dev env
[] install required CLI tools
[] set up MFA
[] learn ticket workflow
[] review escalation guide
[] request repo access
[] bookmark dashboards

Handoff Acceptance Criteria:
- Definition of done: all acceptance criteria met and documented
- Evidence: risk register
- Owner confirmation: Program Manager

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: 7182522a2b3ce5f7310892acbc5f4966

Goal:
- Provide a repeatable workflow for meeting discipline with clear owners and handoffs.

RACI Snapshot:
- Responsible: Engineering Manager
- Accountable: Project Owner
- Consulted: Reviewer
- Informed: Program Manager

Cadence and Rituals:
- Weekly checkpoint: weekly planning
- Monthly review: retrospective
- Communication channel: Teams chat

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a project intake review requests additional acceptance criteria before kickoff

Fingerprint: 732c0fdaa2b43b6b633c9fd1b113995a

Meeting Discipline:
- When to schedule: timebox discussions with decision points
- Default duration: 25 minutes.
- Required doc: risk register

Decision Logging:
- Decision format: Rationale-Tradeoffs-Next steps
- Record location: Notion

Escalation Matrix:
- Level 1: director to exec sponsor
- Level 2: director to exec sponsor
- Level 3: owner to manager

Success Metrics:
- Primary KPI: decision cycle time
- Supporting KPI: decision cycle time
- Review interval: monthly

Anti-Patterns:
- context loss during handoff
- stale documentation leading to rework
- stale documentation leading to rework

Fingerprint: 3b0bdcb5776230332396b41e496d76ee

Onboarding Track:
- Week 1 focus: team intro sessions
- Week 2 focus: pair programming
- Week 3 focus: own a small feature

Tooling Setup Checklist:
[] set up email and calendar

- Definition of done: all acceptance criteria met and documented
- Evidence: decision log entry
- Owner confirmation: Program Manager

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: fc541b5c55625df352542dd9082d3ec5

Goal:
- Provide a repeatable workflow for stakeholder updates with clear owners and handoffs.

RACI Snapshot:
- Responsible: Reviewer
- Accountable: Project Owner
- Consulted: Tech Lead
- Informed: Engineering Manager

Cadence and Rituals:
- Weekly checkpoint: risk review
- Monthly review: status sync
- Communication channel: Teams chat

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- two teams negotiate a milestone change and document the decision in a shared log

Fingerprint: 9d3774e1b5665e1661797cca7d09e0c9

Meeting Discipline:
- When to schedule: share pre-read 24 hours prior
- Default duration: 15 minutes.
- Required doc: meeting notes

Decision Logging:
- Decision format: Problem-Options-Choice
- Record location: Notion

Escalation Matrix:
- Level 1: director to exec sponsor
- Level 2: manager to director
- Level 3: owner to manager

Success Metrics:
- Primary KPI: onboarding completion time
- Supporting KPI: handoff success rate
- Review interval: quarterly

Anti-Patterns:
- stale documentation leading to rework
- context loss during handoff
- context loss during handoff

Fingerprint: 18b13d46bdae13e919de1bfee6955139

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: first demo
- Week 3 focus: resolve a cross-team dependency

Tooling Setup Checklist:
[] join core chat channels
[] set up MFA
[] set up email and calendar
[] subscribe to incident alerts
[] review escalation guide
[] install required CLI tools
[] request repo access
[] bookmark dashboards
[] read team charter
[] learn ticket workflow

Handoff Acceptance Criteria:
- Definition of done: stakeholders sign off in writing
- Evidence: risk register
- Owner confirmation: Engineering Manager

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: d9e65fe067638d9398c9ab143620e33e

Goal:
- Provide a repeatable workflow for hand-offs and ownership with clear owners and handoffs.

RACI Snapshot:
- Responsible: Engineering Manager
- Accountable: Program Manager
- Consulted: Tech Lead
- Informed: Stakeholder

Cadence and Rituals:
- Weekly checkpoint: weekly planning
- Monthly review: retrospective
- Communication channel: Slack channel

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a new joiner gets blocked on access and uses the escalation matrix to resolve it

Fingerprint: 57a3373eeb005ed80e61cf3f2a2cffda

Meeting Discipline:
- When to schedule: schedule only with a written agenda
- Default duration: 45 minutes.
- Required doc: risk register

Decision Logging:
- Decision format: Rationale-Tradeoffs-Next steps
- Record location: Notion

Escalation Matrix:
- Level 1: owner to manager
- Level 2: director to exec sponsor
- Level 3: ops lead escalation

Success Metrics:
- Primary KPI: action item closure rate
- Supporting KPI: handoff success rate
- Review interval: biweekly

Anti-Patterns:
- too many meetings with no decisions
- context loss during handoff
- context loss during handoff

Fingerprint: cbb9101edde1cc570f7e61036440c6ff

Onboarding Track:
- Week 1 focus: team intro sessions
- Week 2 focus: system walkthroughs
- Week 3 focus: run a meeting segment

Tooling Setup Checklist:
[] review escalation guide
[] configure VPN
[] learn ticket workflow
[] set up MFA
[] read team charter

Fingerprint: 106d2c7c21c03850246dcc9a1672b97b

Meeting Discipline:
- When to schedule: schedule only with a written agenda
- Default duration: 30 minutes.
- Required doc: decision log entry

Decision Logging:
- Decision format: Rationale-Tradeoffs-Next steps
- Record location: shared drive

Escalation Matrix:
- Level 1: ops lead escalation
- Level 2: director to exec sponsor
- Level 3: owner to manager

Success Metrics:
- Primary KPI: decision cycle time
- Supporting KPI: handoff success rate
- Review interval: weekly

Anti-Patterns:
- unclear ownership causing delays
- stale documentation leading to rework
- stale documentation leading to rework

Fingerprint: da3d2de6c3a2ee922d746436e88a1847

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: pair programming
- Week 3 focus: write a doc update

Tooling Setup Checklist:
[] subscribe to incident alerts
[] set up local dev env
[] configure VPN
[] join core chat channels
[] set up email and calendar
[] review escalation guide
[] install required CLI tools
[] read team charter
[] set up MFA
[] request repo access

Handoff Acceptance Criteria:
- Definition of done: stakeholders sign off in writing
- Evidence: risk register
- Owner confirmation: Program Manager

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: 7b918f534287db7e5c88fefa9fad4811

Goal:
- Provide a repeatable workflow for escalation and incident comms with clear owners and handoffs.

RACI Snapshot:
- Responsible: Stakeholder
- Accountable: Tech Lead
- Consulted: Project Owner
- Informed: Stakeholder

Cadence and Rituals:
- Weekly checkpoint: status sync
- Monthly review: retrospective
- Communication channel: Email

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a weekly update highlights dependencies and assigns owners for follow-up

Fingerprint: 3d88222dfe99112cf6a165b6f24dbe47

Meeting Discipline:
- When to schedule: schedule only with a written agenda
- Default duration: 30 minutes.
- Required doc: meeting notes

Decision Logging:
- Decision format: Problem-Options-Choice
- Record location: Notion

Escalation Matrix:
- Level 1: manager to director
- Level 2: ops lead escalation
- Level 3: director to exec sponsor

Success Metrics:
- Primary KPI: onboarding completion time
- Supporting KPI: documentation freshness score
- Review interval: monthly

Anti-Patterns:
- unclear ownership causing delays
- unclear ownership causing delays
- stale documentation leading to rework

Fingerprint: 1b75119d638d70e0f2db7714d1a74dfc

Onboarding Track:
- Week 1 focus: team intro sessions
- Week 2 focus: pair programming
- Week 3 focus: write a doc update

Tooling Setup Checklist:
[] read team charter
[] configure VPN
[] set up local dev env
[] review escalation guide
[] set up MFA
[] install required CLI tools
[] bookmark dashboards
[] set up email and calendar
[] subscribe to incident alerts
[] learn ticket workflow

Handoff Acceptance Criteria:
- Definition of done: deployment completed with monitoring
- Evidence: project brief
- Owner confirmation: Stakeholder

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: 5a0e13fa93449cbcc7e0dc4ea4637a62

Goal:
- Provide a repeatable workflow for escalation and incident comms with clear owners and handoffs.

RACI Snapshot:
- Responsible: Reviewer
- Accountable: Project Owner
- Consulted: Project Owner
- Informed: Reviewer

Cadence and Rituals:
- Weekly checkpoint: status sync
- Monthly review: weekly planning
- Communication channel: Slack channel

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- two teams negotiate a milestone change and document the decision in a shared log

Fingerprint: 75901a85607bb435b8c3df297422ab06

Meeting Discipline:
- When to schedule: timebox discussions with decision points
- Default duration: 60 minutes.
- Required doc: risk register

Decision Logging:
- Decision format: Rationale-Tradeoffs-Next steps
- Record location: Notion

Escalation Matrix:
- Level 1: ops lead escalation
- Level 2: director to exec sponsor
- Level 3: manager to director

Success Metrics:
- Primary KPI: action item closure rate
- Supporting KPI: action item closure rate
- Review interval: quarterly

Anti-Patterns:
- stale documentation leading to rework
- too many meetings with no decisions
- context loss during handoff

Fingerprint: 929f289dffcbc634edb0d8a1d8a5fb1b

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: pair programming
- Week 3 focus: resolve a cross-team dependency

Tooling Setup Checklist:
[] configure VPN
[] join core chat channels
[] set up email and calendar
[] subscribe to incident alerts
[] read team charter
[] review escalation guide
[] request repo access
[] learn ticket workflow
[] bookmark dashboards
[] install required CLI tools

Handoff Acceptance Criteria:
- Definition of done: stakeholders sign off in writing
- Evidence: risk register
- Owner confirmation: Engineering Manager

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: c91f879d022e740ec0595b7b5aa1874e

Goal:
- Provide a repeatable workflow for onboarding with clear owners and handoffs.

RACI Snapshot:
- Responsible: Program Manager
- Accountable: Engineering Manager
- Consulted: Program Manager
- Informed: Engineering Manager

Cadence and Rituals:
- Weekly checkpoint: risk review
- Monthly review: weekly planning
- Communication channel: Email

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- a project intake review requests additional acceptance criteria before kickoff

Fingerprint: 216dbf0c6fbb6a0072cef652905991e6

Meeting Discipline:
- When to schedule: schedule only with a written agenda
- Default duration: 45 minutes.
- Required doc: decision log entry

Decision Logging:
- Decision format: Problem-Options-Choice
- Record location: shared drive

Escalation Matrix:
- Level 1: owner to manager
- Level 2: ops lead escalation
- Level 3: owner to manager

Success Metrics:
- Primary KPI: onboarding completion time
- Supporting KPI: onboarding completion time
- Review interval: weekly

Anti-Patterns:
- stale documentation leading to rework
- unclear ownership causing delays
- unclear ownership causing delays

Fingerprint: ddbf200aaf9cf17252cf893510bdeb31

Onboarding Track:
- Week 1 focus: shadow on-call rotations
- Week 2 focus: first small task delivery
- Week 3 focus: own a small feature

Tooling Setup Checklist:
[] bookmark dashboards
[] subscribe to incident alerts
[] review escalation guide
[] join core chat channels
[] learn ticket workflow
[] read team charter
[] set up local dev env
[] request repo access
[] install required CLI tools
[] set up MFA

Handoff Acceptance Criteria:

- Evidence: meeting notes
- Owner confirmation: Engineering Manager

Status Update Template:
Yesterday: ...
Today: ...
Blockers: ...
Risks: ...

Fingerprint: 5b4e697c1e8a1ebc00e408184024c48b

Goal:
- Provide a repeatable workflow for cross-team collaboration with clear owners and handoffs.

RACI Snapshot:
- Responsible: Engineering Manager
- Accountable: Tech Lead
- Consulted: Reviewer
- Informed: Tech Lead

Cadence and Rituals:
- Weekly checkpoint: demo review
- Monthly review: retrospective
- Communication channel: Email

Process Steps:
1. Write a short brief with objective, constraints, and dependencies.
2. Confirm owner and acceptance criteria for the handoff.
3. Track actions with due dates and status notes.
4. Close loop by publishing outcomes and learnings.

Example Scenario:
- two teams negotiate a milestone change and document the decision in a shared log

Fingerprint: 7af1e9e0fda50ee1522fae0f2a77c8d0

Meeting Discipline:
- When to schedule: cancel if owner is absent
- Default duration: 45 minutes.
- Required doc: decision log entry

Decision Logging:
- Decision format: Context-Decision-Consequences
- Record location: Confluence

Escalation Matrix:
- Level 1: ops lead escalation
- Level 2: ops lead escalation
- Level 3: owner to manager

Success Metrics:
- Primary KPI: action item closure rate
- Supporting KPI: action item closure rate
- Review interval: biweekly

Anti-Patterns:
- context loss during handoff
- context loss during handoff
- context loss during handoff

Fingerprint: 57947400698d283c51be691bfcf2da12

Onboarding Track:
- Week 1 focus: access provisioning
- Week 2 focus: first small task delivery
- Week 3 focus: run a meeting segment

Tooling Setup Checklist:
[] set up email and calendar
[] learn ticket workflow
[] join core chat channels
[] review escalation guide
[] configure VPN
[] bookmark dashboards
[] set up local dev env
[] read team charter
[] request repo access
[] install required CLI tools

Handoff Acceptance Criteria:
